

Wood Briquettes

Densified natural wood fuel for compact storage and sustained heat output

Commercial format	Solid wood fuel
Product family	Wood Briquettes
Document use	Commercial product reference

Technical specification

Parameter	Specification
Product type	Densified wood briquettes
Raw material	Natural clean wood residues including sawdust and shavings; chemically treated wood excluded
Format	RUF, NESTRO, Pini-Kay or equivalent according to the offered production
Cross-section / diameter	Typically 60-90 mm depending on format
Piece length	Typically 100-300 mm depending on format
Moisture, as received	<= 10.0%
Ash, dry basis	<= 1.0%
Net calorific value	>= 4.6 kWh/kg as received
Product density	>= 1,000 kg/m ³
Binder / additives	No chemical binder in the standard product; any additive is declared in the applicable documentation
Surface condition	Dry, compact and free of visible foreign material at packing
Packaging	Typically 10-12 kg wrapped packs, palletised; alternative commercial formats by agreement
Storage	Dry, covered and protected from moisture ingress

Commercial note. These parameters define the standard product profile. Order-specific requirements and final supplied values are confirmed by quotation and applicable batch documentation. Certification status is stated only where supported by current documentation.
